

1 Introduction

You can add a paragraph of one line or multiples lines.

Бла бла

You can add **bold text** or *italic text* or **bold and italic**.

You can define headers:

Header 1

2 Header 2

2.1 Header 3

2.1.1 Header 4

2.1.1.1 Header 5

some text

3 head2

You can also add a list of elements:

- which
- are
- going
- to
- be
- displayed
- as
- this !

You like tables ?

| Number | Arrays | Others |
|------------------|------------------------------|--------|
| integer | vector (first-order tensor) | string |
| double precision | matrix (second-order tensor) | — |

| | | |
|---|-----------------------------|---|
| _ | tensor (third-order tensor) | _ |
|---|-----------------------------|---|

Blockquotes are defined like this:

```
def double(L):
    for x in L:
        yield x*2
```
